

CARBON & COR-TEN STEEL MANUFACTURED PRODUCTS

Form and Fiber Inc. offers a 2-year limited warranty on our powder coated finish and a 5-year limited warranty on the steel structure itself. Structure warranty is to be free from defects in workmanship and materials under normal use and all warranties are from the date of delivery to your project. All Form and Fiber warranties are provided to the original Purchaser and/or Owner and are non-transferable without Manufacturer's permission.

THIS WARRANTY DOES NOT COVER THE FOLLOWING:

1. Surface marring caused by failure to remove steel shipping straps and/or protective plastic wrapping in a timely manner. If left on for extended period, including exposure to climatic heat, rain, etc., the surface finish of steel products will be greatly affected.
2. Damage caused to subsurface or surrounding pavement areas caused by leaching of Corten steel as it naturally finishes oxidation.
3. Damage incurred from dropping of units during installation, causing chipping or scratching of powder coat finish and/or denting of steel units.
4. Damage incurred from dropping of products during installation, causing scratching and/or denting.
5. Damage that occurs as the result of impact, act of vandalism, or natural disaster.
6. Damage caused by improperly lifting/moving of unit.
7. Damage that occurs as a result of modifications, or from other parts/systems integrated into planters, (not manufactured by Form and Fiber), including irrigation and drainage installation, piping systems, and any damages resulting from such systems.
8. Warping caused by use of expansive soil in steel products. Light weight planting soil should be used to avoid stress incurred as soils retain moisture and experience freeze/thaw cycles.
9. Damage incurred from drilling/boring into product wall and/or base.
10. Steel units are not warrantied for carrying the weight of rock, which can warp or distort base of unit. Manufacturer has no control of aggregate specified by designer, size, and weight impact and therefore does not warranty steel planter systems that carry in excess of a 2" depth of aggregate at base. Units are load tested for total weight using an average soil weight (not aggregate) therefore, Manufacturer will not warranty load rating beyond the 2" depth of aggregate depth placed under soil profile for drainage.
11. Interior surface damage from loading of rock or other material that scratches internal protective epoxy coating, causing unit to oxidize and rust.
12. Surface damage from use of chemical cleaners or abrasive cleaning tools.
13. Corten Steel surface finish as developed through natural weathering, including patina development from environment exposure; naturally aging the exterior of the Corten steel product.
14. Damage caused to subsurface or surrounding pavement areas caused by exterior and interior oxidation and resulting leaching of rust onto adjacent surfaces.
15. Damage to installed leveling feet, and/or glides caused by excessive loading, excessive leveling height (beyond 2"H leveling), and/or trying to move or level planter while loaded. Damage includes breaking of installed devices, damage to welds compromising installed devices, and/or leaking around devices from impact to weld caused by improperly loading, leveling, and/or movement of unit while loaded.
16. Metal indentions or warping caused by excessive weight placed upon product.
17. Steel products, specifically with surface coatings, not warrantied for salt air exposure.
18. Steel products used as water features.
19. Interior planters with irrigation/drainage systems installed, other than manual watering.
20. Integrated wood for benches. Weathering and structural integrity of wood is not warrantied by Form and Fiber, including on-site deformation, splintering, and discoloration.

WARRANTY NOTES

This warranty does not cover claims for items that have been subject to damage that occurs as the result of impact, mishandling, misuse, neglect, accident, act of vandalism, or natural disaster, or that have been modified or altered, or items that have been subject to maintenance practices other than those specified herein.

It is the Project Designer and/or Purchaser's responsibility for proper placement of both Carbon Steel and Corten Steel products within the built environment, which includes responsibility for understanding the nature of the product material purchased and potential effects on adjacent surfaces and surrounding elements. Form and Fiber, Inc. is not responsible for any consequential damages incurred from the Designer's and/or Purchaser's lack of product understanding and/or responsibility for specified installation. In the case that a product is to be replaced due to Manufacturer defect or failure, Form and Fiber, Inc. will replace product according to terms of Warranty specified herein and is not responsible for any consequential damages incurred by replacement of product, beyond warrantied product itself.

This warranty does not cover naturally occurring changes in Corten Steel surfaces due to the environment.

FREIGHT CLAIMS

1. It is the Purchaser's responsibility to review all units shipped at time of delivery and off-loading. Any damage is required to be reported at that time to the freight carrier and DAMAGE MUST BE NOTED IN WRITING ON BILL OF LADING BEFORE SIGNING FOR RECEIPT OF PRODUCT AND ACKNOWLEDGED BY DRIVER WITH THEIR SIGNATURE ON BILL OF LADING AS WELL.
2. Photos of damaged products must be taken while the object is still attached to the pallet in order to be considered as valid evidence of mishandling by the freight carrier and Purchaser is required to provide photographs with freight claim for damage.
3. All freight damage claims are handled between Purchaser and Freight Carrier. Form and Fiber will not file claims on the Purchaser's behalf, nor mediate or manage the freight claims process.
4. All warranty claims should be handled with a Form and Fiber Representative, directly. Warranty claims will require proper documentation including the original invoice.
5. Upon review of the warranty claim filed by Purchaser, it will be at Form and Fiber's discretion to either fix the existing defective product, replace the existing defective product or offer a refund on the product less any freight, packaging, and up-charge fees.
